

## A façade for a new style of architecture

The façade of a building represents its most expressive element as it is the ideal place to project the specific character of the structure. With Stamisol® FT a new, unique cladding material becomes available for new and astonishing cladding solutions.

### Stamisol® FT stands for:

- an exciting selection of 27 colours, created by renowned architects and colour designers
- a solution which, combined with the coloured breather membranes Stamisol® Color, makes it possible to create 3D and depth effects
- a nearly unlimited freedom of design choices and shapes
- exceptional transparency from inside to the outside, allowing to wrap whole buildings, independently from the position of the windows
- additional digital printing option available providing you with totally free design

**With this innovative textile cladding system Ferrari® revolutionizes the market of ventilated façades and is the first manufacturer to provide solutions for both cladding and weather protection of buildings.**

### STAMISOL® FT 381

New cladding material with fascinating transparency. A textile composite mesh fabric available in 27 trendy colours with additional digital printing option for personalized design

### STAMISOL® Color

Continuously glued onto the sub-structure, this high-end breather membrane protects the thermal insulation from the weather, is wind- and rain-proof and unlimited UV resistant. Stamisol® Color represents an innovative design tool when installed behind transparent or open-joint rainscreens, and is suitable for installation behind glass, polycarbonate, expanded or perforated metal, fibre cement panels, timber and of course the textile façade Stamisol® FT.

- The Ferrari® Group supports professionals: architects, consultants, carpenters, roofing-, façade- and general contractors, and makes available to its partners the company's experience, knowledge and photographic library of projects unique worldwide in terms of international references.
